

AUGUST 2018

Dividend Cash

PROPOSED BY

Dividend.Cash Team

IT'S THE MOST PROFITABLE CRYPTO CURRENCY

Dividend.Cash (DVD) coin is a revenue-generating cryptocurrency, forking from PIVX as a Proof of Stake and Masternode coin, that enables owners to receive dividends that are paid with multiple payout including dash, pivx and another popular masternode cryptocurrency on a daily basis. The dividends come from our shared masternode hosting fee, shared staking hosting service fee, crypto exchange fee and our affiliate programs. In the nearest future, Dividend.Cash will adopt other revenue generating feature.

The big problem of Proof of Stake (PoS) and Masternode coin is inflation and no added value. Even every coin has limited supply, but they will decrease in value because of uncontrolled distribution. They promising high Return of Investment (ROI) but they rewards in their respective cryptocurrency. It's looking good at the beginning, but if they doesn't have added value, their coin become useless and lost in value. Added values are become a key of a successful coin.

DIVIDEND.CASH

To improve user involvement and give added value, Dividend.Cash is going to award incentive bonus, which equals to 40% of the total trading fees, shared masternode hosting fee and shared staking hosting service fee that charged by the platform to users who hold DVD coin in Dividend.Cash platform accounts. Please note that this award proportion could be adjusted based on the actual situation in the future. The initial amount or pre-mine of DVD coin is 165,301 DVD, which about 28,000 DVD owned by the team and owner for future development and about 137,000 DVD will be airdropped to the user. To obtain the daily bonus, users would need to deposit their DVD coin into Dividend.Cash platform. Then the platform will conduct accounting and award bonus based on to the DVD holdings in user's account at 09:00 (UTC+9) that day and all the fees charged to the platform on the previous day. Then the bonus gained by users will directly put to their Dividend.Cash accounts in the corresponding currency.

Here is the example, assuming DVD-BTC cryptocurrency pair rate is 0.01 on the platform and the daily exchange volume is 5,000 BTC. We will charge 0.25% for trading fees, and we will share 40% of the trading fee for DVD coin holder in our platform. The 40% of 0.25% is 0.1%, based on the 0.1% rate from each side, our exchange platform shall charge 5 BTC and 500 DVD coin as trading fees. The bonus for every 1,000 holdings would be 1,000 by 165,301 (~0.6%). So that the daily bonus from this very cryptocurrency pair is 0.03 BTC and 3 DVD. Please note that this is ONLY the DVD-BTC exchange pair BONUS. Other than DVD-BTC, there are still various cryptocurrency pairs on the platform, which creates the trading fees in the corresponding currency and bonus based on the description above.

Not only trading fees that we will share for DVD coin holder, but we will also share 40% of shared masternode host fee and shared staking host fee. Here is the example, assuming PIVX masternode bonus on the previous day is 1,000 PIVX. We charge 5% for shared masternode fees and we will share 40% of them for DVD coin holder in our platform. The 40% of 5% is 2%, based on 2% rate, our platform shall charge 20 PIVX as hosting fee.

The bonus for every 1,000 holdings would be 1,000 by 165,301 (~0.6%). So that the daily bonus from PIVX is 0.12 PIVX. Please note that this is ONLY the PIVX masternode hosting fee BONUS. Other than PIVX, there are still various cryptocurrency on the platform, which creates the masternode hosting fees in the corresponding currency and bonus based on the description above. This example also applied on our staking hosting fee.

WHAT IS POS (PROOF OF STAKE)?

Proof of stake is the consensus algorithm used by cryptocurrencies to validate blocks. The system was initially suggested in 2011 and the first cryptocurrency to implement it was Peercoin in 2012. The main advantages of proof of stake are energy efficiency and security.

In a proof of stake system, the creator of the next block is determined by a randomized system that is, in part, dictated by how much of that cryptocurrency a user is holding or, in some cases, how long they have been holding that particular currency. Instead of computational power, as is the case in proof of work, the probability of creating a block and receiving the associated rewards is proportional to a user's holding of the underlining token or cryptocurrency on the network.

The randomization in a proof of stake system prevents centralization, otherwise the richest individual in the system would always be creating the next block and consistently increasing their wealth and as a result their control of the system.

The main advantage of proof of stake, over a system such as proof of work, is that it uses considerably less energy and as a result is more cost effective. It is well documented that each Bitcoin transaction, which uses a proof of work system, can require as much electricity. This is both ineffective and unsustainable.

In that regard proof of stake can be regarded as a superior consensus protocol as it requires far less electricity to run. Furthermore, as the proof of stake system is so much more cost effective there is less of a need to release too many new coins as a means of incentivizing miners to maintain the network. This helps to keep the price of a particular coin more stable.

Overall, the proof of stake consensus protocol is a robust system that effectively and efficiently fulfills its intended purpose.

WHAT IS MASTERNODE?

A Masternode is a server that performs service functions on a blockchain; such as instant send, coin mixing to support privacy, and aids in stabilizing the network. In return, masternodes are paid rewards, dividends in the form of the coin on a periodic basis, for providing important services.

Anyone can run a Masternode and the objective is to have enough online to provide a true level of decentralization, which doesn't favor a country, a geography, company, or person; assuming the network a network is built to support at a global scale.

But the problem is that one masternode is in the most cases very expensive and at this point Dividend.Cash can help you.

DIVIDEND.CASH

We are sharing seats of a masternode so you don't have to pay a complete masternode collateral but you get the same ROI on your coins like in a full masternode.

Masternodes are created when an amount of the coin is sent to the server's wallet, a form of Proof of Stake – where Masternodes are considered long-term holders, and thus they receive voting rights on the proposals in the network

Masternodes are becoming the new mining and passive income generating assets. Why would anyone buy ASIC miner or overpriced GPUs and get those massive power bills, just to mine some coin that may lose half its value overnight?

MASTERNODE COINS FACTS?

Did you know PIVX? that's the first coin that implemented masternodes with Proof of Stake consensus. On the February 2016, the lowest price was about \$0.000422 and only need \$4.2 to run the full masternode. It means that people who invested about \$4.2 with 10,000 PIVX and got their masternode two years ago have been generating passive income for all this time.

Please note that the 10,000 PIVX those people purchased for about \$4.2 was worth more than \$130,000 in December 2017 and even with all the lows of 2018, that same PIVX is worth more than \$17,000. They generated passive income for the last two years and their initial investment is now worth 4000x or 400000% more.

But, there is some problems! Most of crypto investors have no idea how to setup, maintain and run a masternode. Different coins have different technical requirements to run their masternodes and need time to learn linux commands that deal with the VPS server.

Also for small investor, it's not easy to buy the minimum requirements of the coin. Actually there are some masternode with cheap price to start, it looks good at the beginning. But if they don't have any added value, it will be dead coins and your investment will be lost.

To run a masternode, in the most cases is very expensive and at this point Dividend.Cash can help you. We are sharing seats of a masternode so you don't have to pay a complete masternode collateral but you get the same ROI on your coins like in a full masternode. Dividend.Cash will help you to setup, maintain and run any masternode and staking Proof of Stake coins. Together we can, together we strong.

WHY STAKING TOGETHER IN A POOL?

You don't have to wait for days or weeks to receive a stake. You don't need a personal computer or server that runs 24 hours a day. Due to the size of pool, the optimal time of the stake can be determined. You don't need any technical knowledge!

When you are solo staking you need to have a really big amount of coins, otherwise you have to wait days, weeks or even a month for a stake reward. In our pool we get multiple stakes a day due to our massive network weight.

DIVIDEND.CASH FEATURE

IT'S THE BEST AND ALL IN ONE SOLUTIONS FOR
MASTERNODE INVESTORS.

01

SHARED MASTERNODE HOSTING

Deploy any masternode easily and without delving deep into the code. You can set-up your masternode with a few click and small effort, without annoying linux command anymore.

02

SHARED STAKING HOSTING

We stake coin together, you don't have to wait for days or weeks to receive a stake. You don't need a personal computer or server that runs 24 hours a day. The optimal time of the stake can be determined.

03

CRYPTO EXCHANGE

Masternode owners can receive their rewards and trade them on our exchange platform. Nowadays, masternode investors need to transfer rewards from their wallets to the exchanges and then manually create sell orders in order to get their ROI back. But with us, you can sell it immediately without waiting anymore.

04

AFFILIATE PROGRAMS

Get extra income by refer your friends, we offer 3 level of affiliate scheme. 5% on level 1, 3% on level 2, and 2% on level 3 bonus scheme, so refer your friends as much as you can and get real passive income. The more you refer, the more you earn.

OWNING DVD? GET DIVIDENDS

Each day, 40% of the fee collected by Dividend.Cash platform including shared masternode hosting fee, staking hosting service fee, crypto exchange fee will be distributed to the Dividend.Cash coin holders that stake or run masternode of their DVD coin in our platform. If you hold, run masternode or stake your DVD coin your self, you won't get this dividends.

HOW TO START EARNING PASSIVE INCOME?

- Buy DVD Coin on the exchange or buy our masternode
- Transfer your coin on our platforms.
- You can stake your coin to get staking rewards.
- You can join the masternode and we will automatically set up your masternode, while we fulfills the requirements, your coin will be automatically staking and you will get reward for that.
- You will also get the dividend bonus including dash, pivx and another popular masternode coin based on how much your DVD coin. More DVD coins you have, more dividends will be get.
- Trade on our exchange to get extra income.

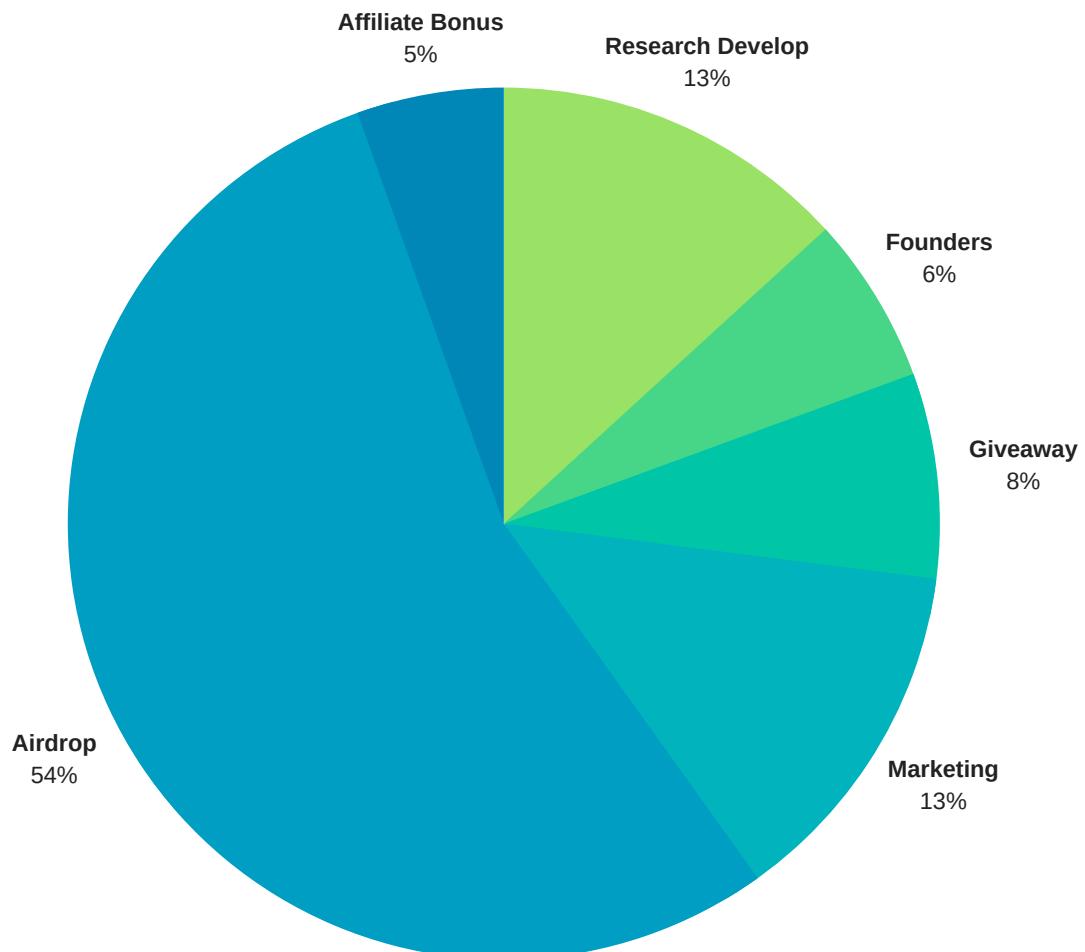

DVD COIN SPECIFICATION

Dividend.Cash will issue a coin called DVD coin that forking from PIVX and has same feature with PIVX, you can learn more about PIVX feature here. The DVD coin will be available to get for free with airdrop, bounty and purchase during our masternode pre-sale campaign that will take place in the early of August 2018.

DIVIDEND.CASH

- Name: Dividend.Cash
- Symbol: DVD
- Address Prefix: D
- Block Reward: 2-25 DVD
- Masternode Collateral: 1.000
- Block Reward Distribution: 80% Masternode / 20% Stakers
- PoW Algorithm: Quark
- Block time: 60 seconds
- Confirmation: 6
- Block Maturity: 50
- P2P Port: 29997
- RPC Port: 29998
- Max Supply: 21.210.101 DVD for approximately 10 years
- Premine: 165.301 (~0.77%) for airdrop and further development of the project, because we really care about

Premine Allocation

- Research & Development : 21,834 DVD
- Founders : 10,265 DVD
- Giveaway : 12,571 DVD
- Marketing and Bounty : 21,631 DVD
- Airdrop : 90,000 and 9,000 (10% of airdrop) for affiliate bonus

AFFILIATE CONTEST

Join the Dividend.Cash referral program to help us spread the word, and a chance for you to win total 2,150 DVD coin. You will also earn a 10% commission of the total number of coin that get by anyone you refer. Take this opportunity now and refer your friend as much as you can. The more you refer, the more you earn.

Affiliate Reward

- 1st place : 1000 DVD coin
- 2nd place : 500 DVD coin
- 3rd place : 250 DVD coin
- 4th place : 150 DVD coin
- 5th place : 100 DVD coin
- 6th place : 50 DVD coin
- 7th place : 40 DVD coin
- 8th place : 30 DVD coin
- 9th place : 20 DVD coin
- 10th place : 10 DVD coin

How to apply?

- Register to dividend.cash and get your referral link
- Share your unique referral link with your friends.
- Your friend clicks on your referral link.
- He/she registers for the airdrop and gets assigned to you.

Use Case

Your friends get 5000 DVD coin during the Airdrop and we'll send you 500 DVD coin directly

Rules

- The rank position based on total coin that you have
- Total coin calculation are : Your Coin + coin that get by anyone you refer
- Don't think about making bots or signing up dupe accounts yourself, it won't be counted
- You can check your rank on our dashboard
- Earn 10% DVD coin on whatever they get
- This contest only held during Airdrop distribution

DIVIDEND.CASH

ROADMAP

- | | |
|---------|--|
| Q2 2018 | <ul style="list-style-type: none">• Idea• Research the system• Develop the system• Launch Website Beta Version• Testing the system• Market testing |
| Q3 2018 | <ul style="list-style-type: none">• Evaluate the testing and revision• Genesis Block Creation• Dividend.Cash blockchain• Mac, Windows and Linux Wallet• Launch the Website• Launch the Block Explorer• Airdrop Distribution• Masternode Pre-sale• Affiliate contest announcement• Submit to External Exchange |

MASTERNODE PRE-SALE

We will hold masternode pre-sale for 5 rounds. Each round will be sold until sold out. If all Dividend.cash in the previous round are sold out, we will continue to the next round. There are total 75,000 DVD will held for the pre-sale for the first 75 masternodes for securing the network.

Masternode Price

ROUND	AMOUNT	PRICE PER NODE
1	10 MASTERNODE	0.10 BTC
2	15 MASTERNODE	0.15 BTC
3	25 MASTERNODE	0.20 BTC
4	15 MASTERNODE	0.25 BTC
5	10 MASTERNODE	0.30 BTC

Use of funds

- Masternode Listing Websites: 1 BTC
- Exchange Listings: 6 BTC
- Server Infrastructure: 1 BTC
- Team Support: 2 BTC
- Marketing: 5 BTC

WHY YOU MUST BUY DVD MASTERNODE?

What you will get if you buy masternode?

- Get 1001 DVD Coin to set up the masternode
- Become early investor to get more income from your masternodes
- The early masternode will get fast return on capital
- Less masternode, more you will earn
- For the first 2 month, the masternode owner will get 90% of the block rewards, and then 80% after that
- You will be our special investor and join our discord private channel
- Get early news on our development, so you can prepare before everything happened

WHY DIVIDEND.CASH

01

BEST INVESTATION FOR YOU

By owning DVD coin, you will get a lot of benefits. It's not only a coin, but DVD coin will determine how much dividends that you will get. The more you have, the more you get.

02

BETTER THAN ANY MASTERNODES AND STAKING COIN

Not only Masternode and Staking bonus that you will get as a reward. But, you will also get dividends.

03

KEEP EARNING EVEN WHEN YOU LOSE IN TRADING

You lost in trading? don't worry, you will keep making money even if the price is low. Just join masternode or stake your DVD coin, and enjoy our dividend bonus.

04

REAL PASSIVE INCOME, WE WILL GROW YOUR MONEY

We give you a lot of bonus, from our Dividends you will get multiple payout, and from Masternode and Staking you will get DVD as a reward.

05

CAN THE VALUE OF DVD COIN BECOME WORTHLESS?

Given dividend, PoS and masternode system stimulates users to hold their coins, we expect a steady growth in price over time.

THANK YOU

Thank you for taking the time to read this white paper. We hope you will use this information in this document as a guide for making an informed investment decision. We have specially designed our referrals, staking percentages, and dividends with the sole intent of keeping Dividend.cash sustainable and profitable for the long term. We believe that Dividend.cash will be profitable for long term because new investors want to join to get our dividends, so the price of Dividend.cash will always increase. We have dividend as added value of this platform. We are committed to provide long term programs that are secure and sustainable.
